

RESIDENTIAL PLAZA AT BLUE LAGOON VISITATION

Visitation should be person-centered, considering the residents' physical, mental, and psycho-social well-being and supporting their quality of life.

Visitors must adhere to the Core Principles of COVID-19 Infection Prevention outlined below, regardless of vaccination status. Visitors who cannot adhere to the Core Principles of COVID-19 Infection Prevention will not be permitted to visit or will be asked to leave. Visiting can occur safely by following a person-centered approach and adhering to these core principles of infection prevention.

Visitation will always be allowed for all residents. Residential Plaza will no longer limit the frequency and length of visits for residents or the number of visitors or require advance scheduling of visits.

Although there is no limit on the number of visitors a resident can have at one time, visits must be conducted according to the Core Principles of COVID-19 Infection Prevention.

If a COVID-19 outbreak among residents or staff is identified, residents and their families will be notified of the ongoing investigation. While it is safer for visitors not to enter the facility during an outbreak investigation, they will still be allowed. Visitors should be aware of the potential risk of visiting during an outbreak investigation and adhere to the core principles of infection prevention.

Core Principles of COVID-19 Infection Prevention

- We ask visitors to refrain from visiting if they have any of the following:
 - a positive viral test for SARS-CoV-2,
 - symptoms of COVID-19, or
 - if they currently meet the criteria for quarantine
- Refrain from the common areas or visiting if you show signs or symptoms or those who have had close contact with someone with COVID-19 infection in the prior 14 days (regardless of the visitor's vaccination status).
- Hand hygiene (use of alcohol-based hand rub is preferred).
- The use of a facemask is optional, regardless of vaccination status.
- Social distancing at least six feet between people.
- Instructional signage throughout the community and proper visitor education on COVID-19 signs and symptoms, infection control precautions, other applicable facility practices.

- Cleaning and disinfecting high frequency touched surfaces in the community.
- Appropriate staff use of Personal Protective Equipment (PPE).
- Effective isolation of residents positive or at risk of COVID-19 (e.g., separate areas dedicated to COVID-19 care).
- Resident and staff testing in case someone is showing symptoms or is at risk by contact.

These core principles are consistent with the Centers for Disease Control and Prevention (CDC) guidance for long-term care facilities and **should be always adhered to**.

Please note that no pets will be permitted at this time.

THANK YOU FOR YOUR CONTINUED SUPPORT!
